*CMY combinations and colour temperature conversions + amber are enabled when slots 9 and 10 are both to zero.

NOTE: Slot 9 allows a coarse selection of saturated reference colours.

On each of them it is possible to choose a number of variations, from darker to lighter, by slot 10 (for a total of 93 colours)

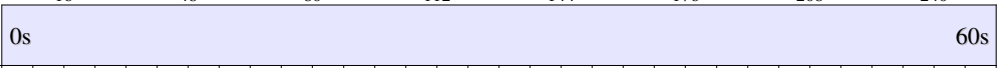

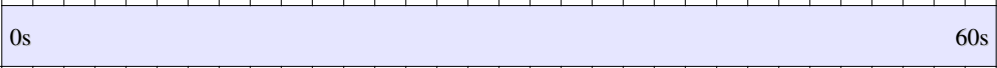

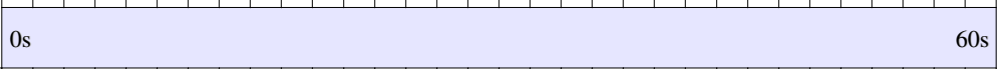

When slot 9 is on “White/Light colours”, by slot 10 it is possible to choose either the lamp colour temperature or a selection of light colours.

When slot 9 is on “rainbows”, slot 10 becomes the selector of the 6 different available rainbow types. Hard or soft stands for passing from one colour to the next one in hard or soft mode.

The rainbow speed is adjustable by slot 11.
